SoNE HEALTH ANNOUNCES FORMATION OF MEDICAL GROUP

SoNE HEALTH Medical Group offers a place for all physicians wishing to align with a practice dedicated to value-based care and population health.

WINDSOR (Conn.) – January 12, 2025 – Southern New England Healthcare Organization ([SoNE HEALTH](#)), a clinically integrated medical provider network recognized as the regional leader in value-based care and population health, has announced the formation of [SoNE HEALTH Medical Group](#), an innovative new medical practice focused on building strong, trusting and collaborative relationships between patients and physicians.

The SoNE HEALTH Medical Group will be open to physicians and advanced practice providers (APPs) seeking to migrate from an independent practice or an employed arrangement to a transformational medical group focused on delivering high-quality patient care with exceptional patient satisfaction. SoNE HEALTH Medical Group will mirror SoNE HEALTH's model of innovation and independence, **a medical group owned by physicians** that provides them with a voice in practice governance.

“In this era of the ongoing disruptive delivery of healthcare, this is a unique opportunity for providers—an option that places the priority on them and their patients,” said Kris Gorman, MBA, RD, Vice President of Physician Services. *“SoNE HEALTH offers a seat at the table for all providers, whether they prefer independence or employment. At SoNE HEALTH, we understand and value providers as the life source of our health system. As such, they should have the flexibility and autonomy to practice medicine however they prefer.”*

“A trusting and collaborative patient-physician relationship is the most important relationship in healthcare, one that must never be compromised,” explained James Uberti, MD, SoNE HEALTH Medical Group President. *“SoNE HEALTH Medical Group is designed to cultivate strong relationships. A patient’s primary care provider (PCP) will guide patient care, collaborating with the patient and specialty care providers to ensure the right care is provided in the right location. We will emphasize delivering holistic care to address all patient needs. With a PCP at the helm, patients will have a partner in their care, someone dedicated to managing their health journey in all aspects, focusing on prevention and chronic disease management to optimize quality of life.”*

SoNE HEALTH welcomes physicians and advanced practice providers seeking something different, talk to start a contact info@sonemedgroup.com.
